"Designing Professional Web Sites Since 1997"

infokwik.com

Our Clients are... Businesses that:

- ➔ Wish to establish a premier presence on the Internet by offering new and innovative products and services.
- ➔ Want to expand their markets to encompass the global scope of the Internet.
- ➔ Want to move beyond the first generation static web sites they currently have in place.
- ➔ Need assistance learning the latest technical skills.
- ➔ Face a critical shortage of technical resources required to implement new applications for the web.
- ➔ Want to move their business to the web but, don't know where to begin.
- ➔ Are confused by rapidly evolving Internet technologies, standards, and tools.

Established Link Popularity

Listed in 14 Web Malls

● **Internet Advertising**

Banner Advertising on 14 KC community sites

(To view our Banner Ads go to any of the sites listed above and you will see our current Banner Ads at the top of the page.)

- Now receiving over... One Million hits per month.
- Local Information is the most sought after on the Internet. Our websites focus on the Kansas City Metro Area, but reach the world wide web also. In retail or service businesses you don't open your store and wait for customers to come. It's the same way with your web store front.

- We will show you how to advertise, market and create your own internet presence for a price you can afford. Advertising through Infokwik.com community web sites for the Kansas City Metropolitan area is cost effective and gets results.

● **Email Marketing**

We specialize in targeted email to internet buyers and small businesses.

To reach the customers you want to reach, you need more than a good product and fire in your gut. You need strategy. And creating an effective strategy requires research, which most marketers don't have the time or resources to do.

Don't believe the hype you read about the Internet becoming a mass market. Even with the advent of broadband and streaming video, the Net will never be one big living room where the whole family sits down to watch the same show. The real money to be made on the Net is through one-to-one marketing, connecting buyers and sellers in a global marketplace. Bank on it!
